This Office action is responsive to the reply of November 19, 2007. Per the reply, claims 1, 2, 7 and 9 have been cancelled. Claims 3-6, 8 and 10-21 remain pending and under examination.

The prior art rejection based on Warner et al in view of Maughon et al is withdrawn in view of the amendment rewriting claim 3 to include the limitations of former claim 9 and applicant's arguments respecting claim 21. The provisional double patenting rejection is withdrawn in view of applicant's stated intention to cancel conflicting claims 2, 6 and 7 from copending application no. 11/783,705.

Claims 3-6, 8 and 10-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. More specifically, the following grounds for indefiniteness apply to the indicated claims.

(A) Claims 3 and 8 are mutually inconsistent in the recitation of crosslinking agent. Whereas claim 3 calls for a "radical generating" crosslinking agent, claim 8 states that the crosslinking agent "is an epoxy compound". A radical generating agent and an epoxy compound are, however, mutually exclusive in terms of crosslinking mechanism as evidenced by their description herein as *alternative* crosslinking agents (*cf.*, Specification page 13, ll. 23-25). As such, an epoxy compound is not a subgenus of "radical generating" crosslinking agent and, therefore, claim 8 is inconsistent with the limitations of the base claim.

Art Unit: 1796

(B) Independent claim 21 provides the limitation to "said post-crosslinkable thermoplastic resin" (see, penultimate line). There is no proper and sufficient antecedent basis for this limitation in the claim. Clarification and appropriate correction are required.

Claims 3-6, 8 and 10-21 are deemed free of the prior art.

In view of the new grounds of rejection, this action is made non-final.
